Concept for testing stoves for all UNACC members

Scope;

- Household solid biomass stoves using firewood, charcoal, briquettes, agricultural residues, pellets as fuel.

Objectives;

- Household solid biomass stoves using firewood, charcoal, briquettes, agricultural residues, pellets as fuel.

Needs Assessment Study & Priority Focus for UNACC

Objectives of the Study

- Identify Technical, Management and Financial capacity gaps of member enterprises
- Identify anticipated services members have from UNACC
- Identify stakeholders UNACC will partner with during the awareness and market development campaign(s)

Percentage of assessed UNACC members from each category

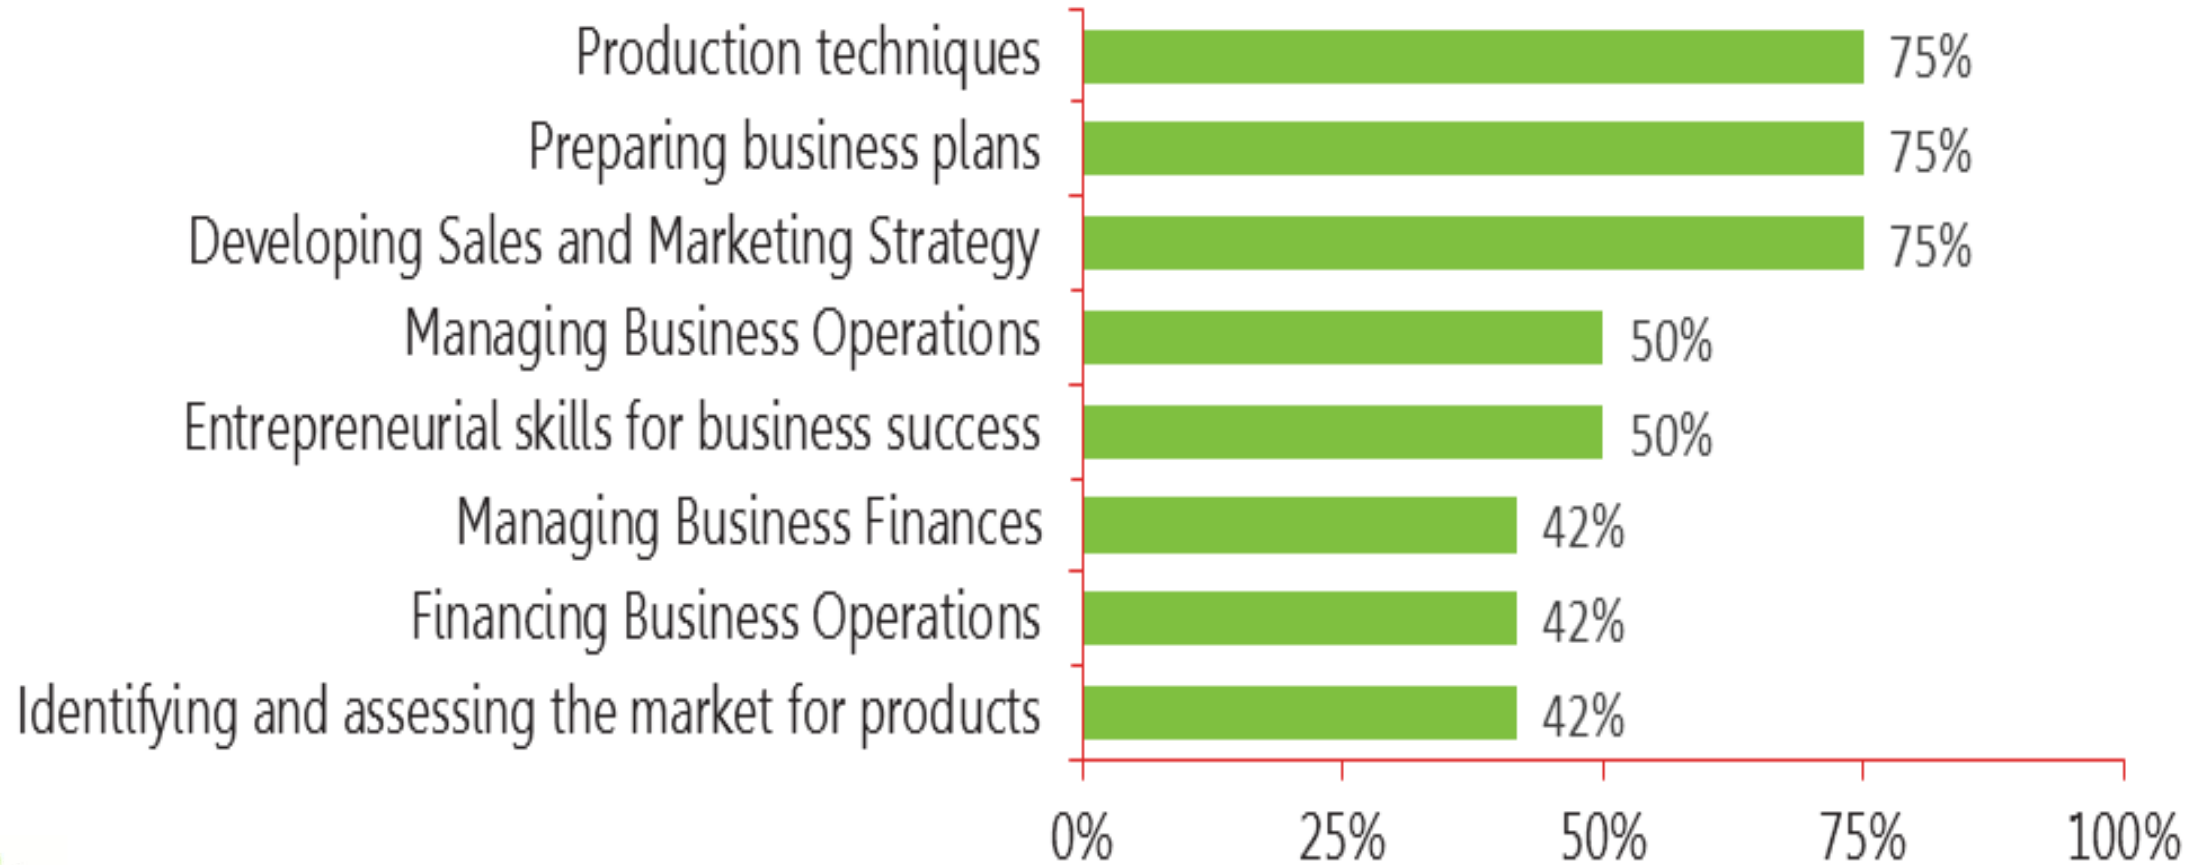

Total number of members assessed under each category against the total number of UNACC members registered

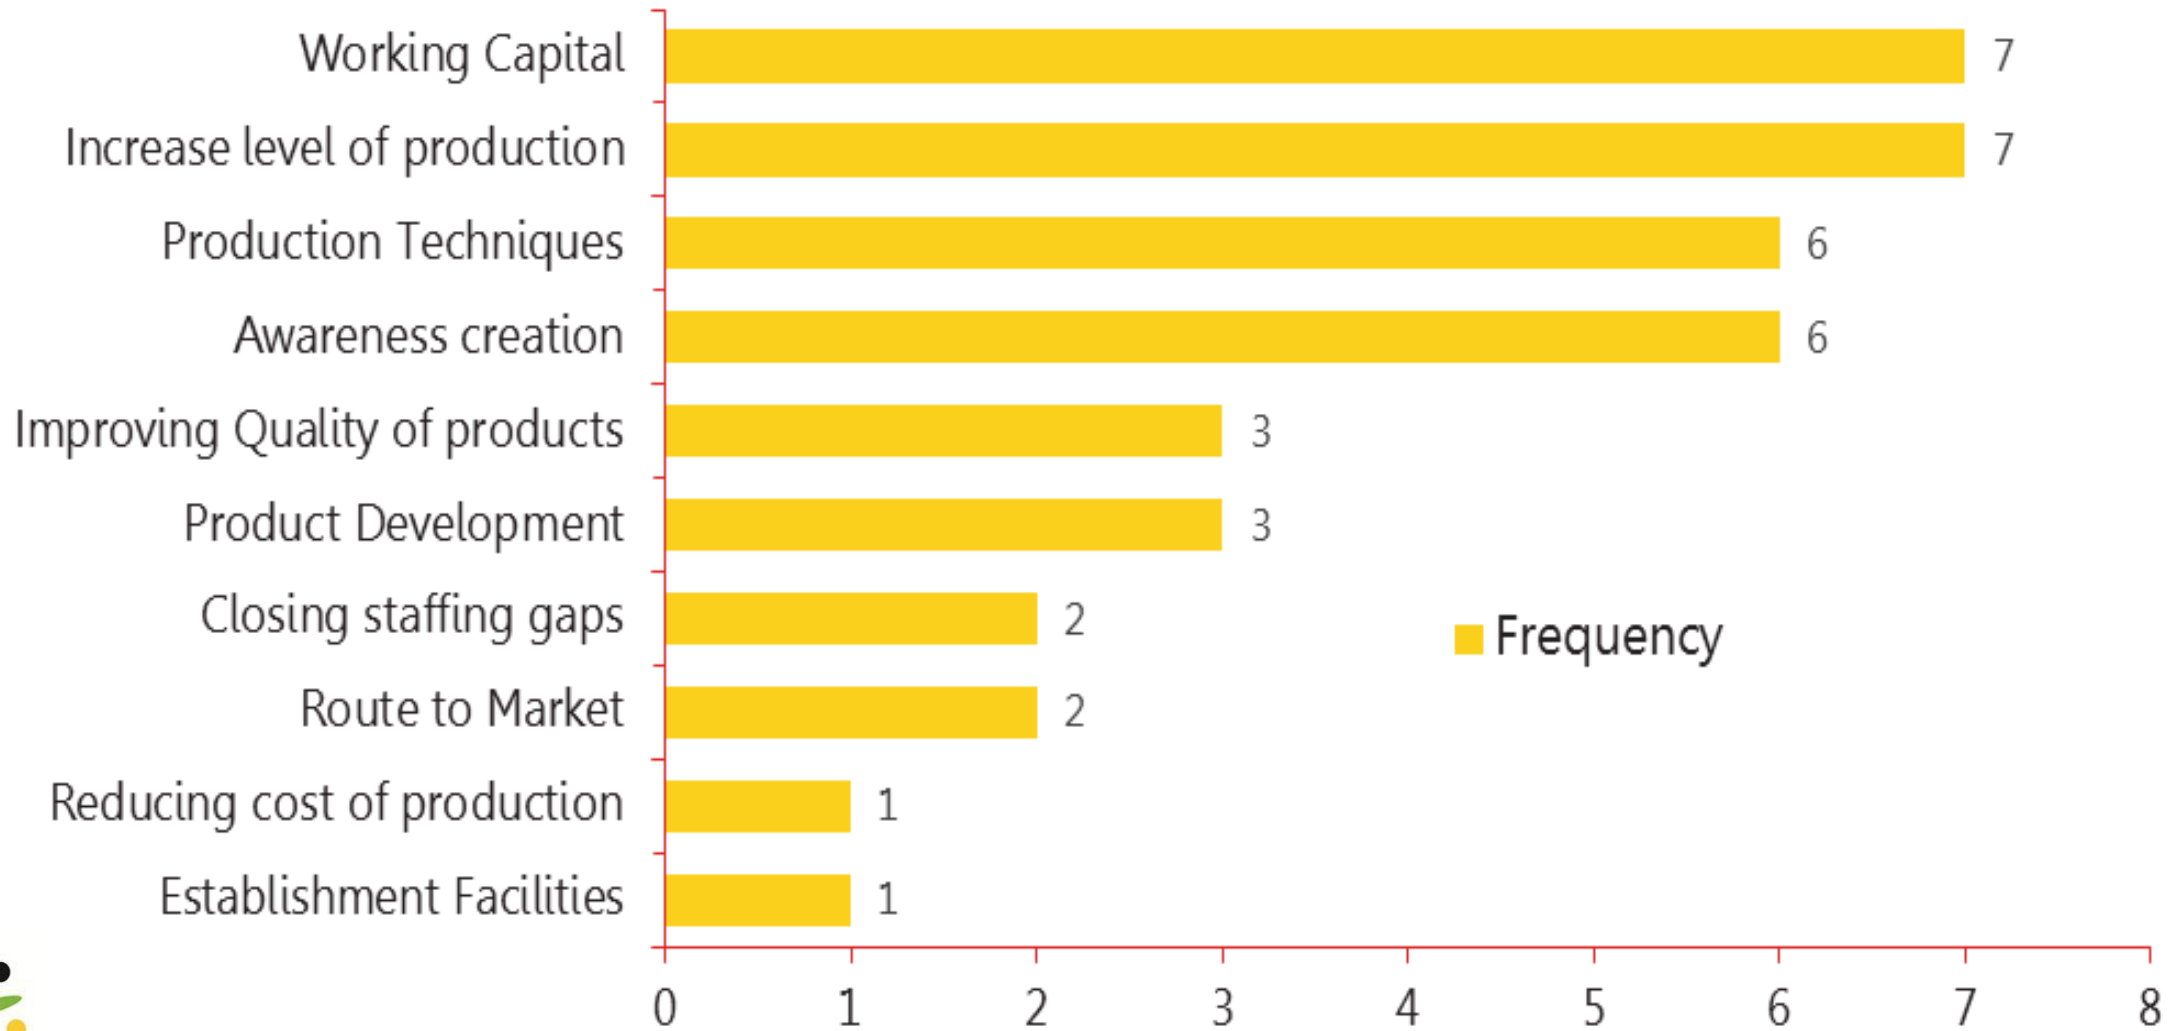

Challenges of implementing clean cooking activities

- Access to Finance
- Access to markets
- Community Beliefs, Attitudes and Behaviours
- Lack of Awareness
- Absence of Quality Standards
- Poverty of the population
- Duplication of Efforts by different development partners
- Entrepreneurs work culture
- Inadequate Capacity of Value Chain Actors

Percentage of manufacturers that require training in the different technical areas

Top five development needs mentioned

Services that members expect from UNACC

- Awareness creation and market development to create a demand pull for clean cooking solutions
- Build capacity of manufacturers ICS and improved fuels and other value chain actors.
- Policy and Advocacy for a better regulatory environment
- Developing quality standards for clean cooking technologies
- Mobilisation of funds
- Develop partnerships with interesting organisations
- Create a platform for networking and communication

Conclusions

- Quality of Products
- Capacity Building
- Policy and Advocacy
- Awareness Creation and Products Promotion
- Building Strategic Partnerships
- Monitoring and Evaluation
- Resource Mobilization
- Financing options for the Sector
- Support development of distribution/route to market
- Promotion of alternative fuels/briquettes subsector

Thank You!
